### Description of System and Source

The Sebastopol water system is located in Sonoma County and serves the City of Sebastopol. There are approximately 2,675 service connections serving a population of 7,575.

The City of Sebastopol obtains all of its water from underground wells that draw water from depths between 130 to 690 feet below ground. There are currently five wells, all located within the City limits along a major transportation corridor, Highway 116. The wells are located 1,300 feet or more to the west of a perennial waterway known as the Laguna de Santa Rosa, which is a major tributary to the Russian River.

Well 02, the subject of this assessment, was constructed in 1934, the oldest of the City's wells. It is 600 feet deep and produces approximately 480 gallons per minute.

Previous studies have determined that the principal recharge area for the Sebastopol wells is from the portion of the Wilson Grove Formation (formerly known as the Merced Formation) in the rolling hills west of the City. There is some additional recharge from the east.

Land use in the vicinity of the wells includes municipal, industrial, residential, and commercial activities within the City limits. The protection zones and recharge areas extend into the rural areas just outside the City.

### Assessment Procedures

The assessment of the source WELL 02 was conducted by the California Department of Health Services in conjunction with the City of Sebastopol as a demonstration of the Drinking Water Source Assessment and Protection (DWSAP) program. The City was fortunate to have several studies conducted regarding their water supplies and the ground water resources in the area. This information included a map of the recharge area and approximate flow directions. This information was the basis for using the Modified Calculated Fixed Radius delineation method.

Due to the relative proximity of the five wells, the protection zones for the wells overlap. The City and DHS chose to define one set of larger zones that encompasses the protection zones for all five wells. The PCA inventory and vulnerability ranking portions of the assessment were conducted for the larger combined zones, and not for each well separately.

The following sources of information were used in the assessment: DHS water system files, City files, City personnel, CUPA (Certified Unified Program Agency) records, and previous studies.

Procedures used to conduct the assessment included: meetings with the City to conduct the inventory, and file reviews.

### Discussion of Vulnerability

One of the five wells (Well 05) in the City's drinking water system is currently shut down due to contamination by tetrachloroethylene (PCE). Another well (04) has shown very low levels of petroleum products (1,2-DCA, Benzene, and MTBE), but is still on-line though the use is limited. The most likely source of contamination of the wells is commercial activities (dry cleaners and gas stations) within the City limits. Due to the loss of production capacity, the City recently constructed a new well (07) at substantial cost.

## Vulnerability Summary

District Name DHS Sonoma District District No. 18 County Sonoma  
System Name Sebastopol, City of System No. 4910011  
Source Name WELL 02 Source No. 001 PS Code 06N/09W-02C01 M  
Completed by Leah Walker Date November, 1998

### THE FOLLOWING INFORMATION MUST BE INCLUDED IN THE SYSTEM CONSUMER CONFIDENCE REPORT

A source water assessment was conducted for the WELL 02  
of the Sebastopol, City of water system in November, 1998.

The source is considered most vulnerable to the following activities associated with contaminants detected in the water supply:

- Automobile- Gas stations
- Dry cleaners
- Known Contaminant Plumes
- Underground storage tanks - Confirmed leaking tanks

The source is considered most vulnerable to the following activities not associated with any detected contaminants:

- Chemical/petroleum processing/storage
- Historic gas stations
- Metal plating/ finishing/fabricating
- Plastics/synthetics producers
- Septic systems - high density

A copy of the complete assessment may be viewed at:

DHS Sonoma District Office  
50 D Street, Suite 200  
Santa Rosa, CA 95404

You may request a summary of the assessment be sent to you by contacting:

District Engineer

## Delineation of Ground Water Protection Zones

District Name DHS Sonoma District District No. 18 County Sonoma  
 System Name Sebastopol, City of System No. 4910011  
 Source Name WELL 02 Source No. 001 PS Code 06N/09W-02C01 M  
 Completed by Leah Walker Date November, 1998

### Method Used to Delineate Protection Zones

1. Calculated Fixed Radius

**X 2. Modified Calculated Fixed Radius** (Attach documentation for direction of ground water flow.)

3. More Detailed Methods

4. Arbitrary Fixed Radius (For use only by or permission of DHS)

Maximum Pumping Rate of Well (Q)	<u><b>480</b></u>	gallons/minute
	<u><b>774</b></u>	acre feet/year
	<u><b>33,728,160</b></u>	cubic feet/year
Effective Porosity	<u><b>0.15</b></u>	% <input type="checkbox"/> Default Value
Screened Interval of Well	<u><b>268</b></u>	feet <input type="checkbox"/> Default Value

Direction of Ground Water Flow	<u><b>90.00</b></u>	degrees
--------------------------------	---------------------	---------

Protection Zone	Calculated Value	Minimum Value	Base Radius	Direction	Modified Distance
Zone A - 2 Year TOT*	731 Feet	600 Feet	731 Feet	upgradient	<b>1,096</b> Feet
				downgradient	<b>365</b> Feet
Zone B5 - 5 Year TOT*	1,156 Feet	1,000 Feet	1,156 Feet	upgradient	<b>1,733</b> Feet
				downgradient	<b>578</b> Feet
Zone B10 - 10 Year TOT*	1,634 Feet	1,500 Feet	1,634 Feet	upgradient	<b>2,451</b> Feet
				downgradient	<b>817</b> Feet

B5	Contractor or government agency equipment storage yards (M)		3	3	3	9
B5	Drinking water treatment plants (M)		3	3	3	9
B5	Food processing (M)		3	3	3	9
B5	Hardware/lumber/parts stores (M)		3	3	3	9
B5	Hospitals (M)		3	3	3	9
B5	Housing - high density (>1 house/0.5 acres) (M)		3	3	3	9
B5	Parking lots/malls (>50 spaces) (M)		3	3	3	9
B5	Parks (M)		3	3	3	9
B5	Septic systems - high density (>1/acre) (VH if in Zone A, otherwise M)		3	3	3	9
B5	Transportation corridors - Freeways/state highways (M)		3	3	3	9
B5	Transportation corridors - Historic railroad right-of-ways (M)		3	3	3	9
B5	Transportation corridors - Road Right-of-ways (herbicide use areas) (M)		3	3	3	9
B5	Wells - Water supply (M)		3	3	3	9
B10	Furniture repair/ manufacturing (H)		5	1	3	9
B10	Machine shops (H)		5	1	3	9
B10	Railroad yards/ maintenance/ fueling areas (H)		5	1	3	9
B10	Wood preserving/treating (H)		5	1	3	9
A	Agricultural Drainage (H in Zone A, otherwise M)		5	0	3	8
A	Chemical/petroleum pipelines (H)		5	0	3	8
A	Farm machinery repair (H)		5	0	3	8
A	Illegal activities/ unauthorized dumping (H)		5	0	3	8
A	Lumber processing and manufacturing (H)		5	0	3	8
A	NPDES/WDR permitted discharges (H)		5	0	3	8
A	Pesticide/fertilizer/ petroleum storage & transfer areas (H)		5	0	3	8
A	Underground storage tanks - Not yet upgraded or registered tanks (H)		5	0	3	8
A	Wells - Agricultural/ Irrigation (H)		5	0	3	8
A	Wells - Oil, Gas, Geothermal (H)		5	0	3	8
B5	Chemical/petroleum pipelines (H)		5	0	3	8
B5	Farm machinery repair (H)		5	0	3	8

\* = A contaminant potentially associated with this activity has been detected in the water supply.

## Vulnerability Ranking

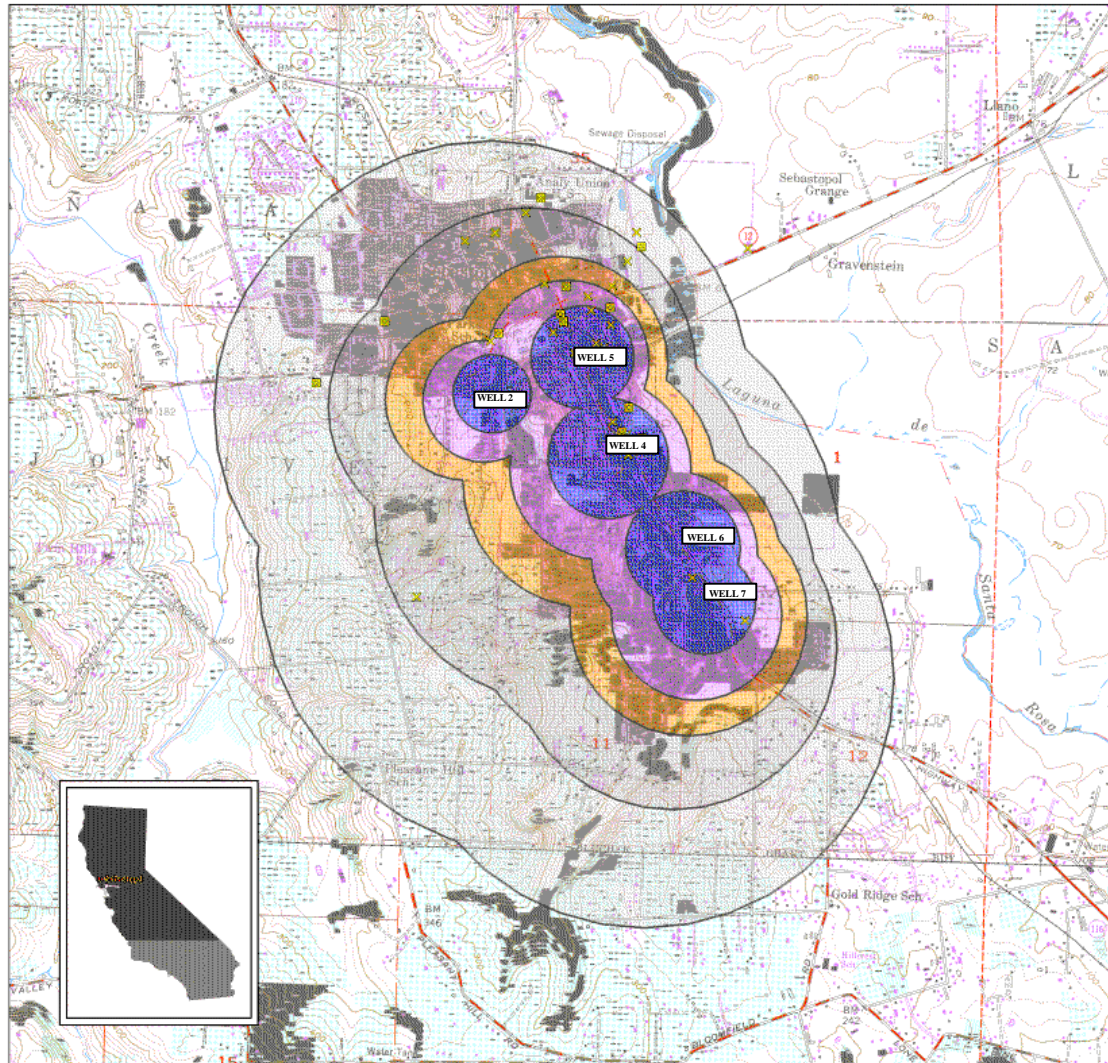

System Name Sebastopol, City of System No. 4910011  
 Source Name WELL 02 Source No. 001 PS Code 06N/09W-02C01 M

Zone	PCA (Risk Ranking)	*	PCA Risk Points	Zone Points	PBE Points	Vulnerability Score
B5	Illegal activities/ unauthorized dumping (H)		5	0	3	8
B5	Lumber processing and manufacturing (H)		5	0	3	8
B5	NPDES/WDR permitted discharges (H)		5	0	3	8
B5	Pesticide/fertilizer/ petroleum storage & transfer areas (H)		5	0	3	8
B5	Underground storage tanks - Not yet upgraded or registered tanks (H)		5	0	3	8
B5	Wells - Agricultural/ Irrigation (H)		5	0	3	8
B5	Wells - Oil, Gas, Geothermal (H)		5	0	3	8
B10	Chemical/petroleum pipelines (H)		5	0	3	8
B10	Farm machinery repair (H)		5	0	3	8
B10	Illegal activities/ unauthorized dumping (H)		5	0	3	8
B10	Lumber processing and manufacturing (H)		5	0	3	8
B10	NPDES/WDR permitted discharges (H)		5	0	3	8
B10	Pesticide/fertilizer/ petroleum storage & transfer areas (H)		5	0	3	8
B10	Underground storage tanks - Not yet upgraded or registered tanks (H)		5	0	3	8
B10	Wells - Agricultural/ Irrigation (H)		5	0	3	8
B10	Wells - Oil, Gas, Geothermal (H)		5	0	3	8

\* = A contaminant potentially associated with this activity has been detected in the water supply.

# Drinking Water Source Assessment and Protection Program Control Zone Delineation City of Sebastopol, California

- Zone A – Direct Protection Zone
- Zone B5 – Inner Protection Zone
- Zone B10 – Outer Protection Zone
- Buffer Zone 20
- Buffer Zone 50
- Drinking Water Wells
- Active Toxic Site Investigations
- Closed Toxic Sites

Polygon boundaries and point locations are approximate.
